HD351W

Hotel/hospitality features

Power over Ethernet (PoE)

DECT handset

WLAN

HD audio

Anti-bacterial housing

The HD351W is designed as a comfortable, slimline modern hotel/guest room telephone that offers guests the greatest possible freedom of movement with a cordless DECT handset and also the most important features such as speed dialing to all hotel facilities and rooms, hands-free calling, hold and mute. If required, it can be expanded with up to 4 additional DECT handsets of type HD3.

The PoE power supply and the Gigabit Ethernet connection allow the device to be integrated into a centrally managed, future-proof network infrastructure.

Alternatively, the device can also be operated independently of network cabling via WLAN and the power supply included.

All settings of the HD351W can of course be administered centrally. The antibacterial housing protects against germs and is easy to clean. The large, visual LED call and message indicators as well as the individual labeling options complete the overall picture.
